DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/18/2008 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 30-33, and 36-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Hattler et al (US 5,501,663).

Hattler et al disclose in Figure an intravenous oxygenator comprising a twisted bundle of fibers (42) connected to a gas supply means (72) through a first connection (62) and to a gas evacuation means (73) through a second connection (64); the fiber bundles being disposed in series and having individual connection pairs; both bundles twisted in the same direction.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claim 34 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hattler et al in view of Berry et al (US 5,125,902).

Hattler et al disclose the claimed invention except for the fibers resting against an impermeable sheathing. Berry et al disclose in Figure 10 that it is known to use of sheathing to enclose a twisted bundle of fibers. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the invention as taught by Hattler et al with an impermeable sheath as taught by Berry et al, since such a modification would facilitate the insertion of the device into the patient (abstract).

2. Claim 35 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hattler et al in view of Berry et al (US 5,098,376).

Hattler et al disclose the claimed invention except for the fibers resting against an impermeable sheathing. Berry et al disclose in column 7, line 61 - column 8, line 2 that it is known to use a diameter of between 15 and 25mm. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the invention as taught by Hattler et al with a diameter of 15 to 25mm astaught by Berry et al, since such a modification would allow for the insertion of the device into narrow diameter vessels.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Application/Control Number: 10/522,331 Page 4

Any inquiry concerning this communication or earlier communications from the examiner should

be directed to CATHERINE N. WITCZAK whose telephone number is (571)272-7179. The examiner

can normally be reached on Monday through Friday, 8-5 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin

Sirmons can be reached on (571) 272-4965. The fax phone number for the organization where this

application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be obtained

from either Private PAIR or Public PAIR. Status information for unpublished applications is available

through Private PAIR only. For more information about the PAIR system, see http://pair-

direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer

Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR

CANADA) or 571-272-1000.
